## Algebraic Thinking

*“Finally, a math program that makes learning algebra fun and exciting for kids. Algebraic Thinking lets kids master concepts in a profound way that I have never seen.”*

—Carlos Garcia  
Superintendent  
San Francisco Unified School District  
San Francisco, CA

National Training Network

Middle Grades

## What is Algebraic Thinking?

- Comprehensive and ongoing **staff development** is combined with on grade level middle school mathematics instruction to raise the achievement and confidence of students who have struggled in mathematics to become highly competitive in high school mathematics.
- **Staff Development** is provided through a **five-day workshop** and ongoing support through the “Seven Levels of Staff Development.”
- **Proven Methodology** creates opportunities for students to experience success with fundamental skills which are continually integrated into high levels of understanding.

## Components of Success

- Staff Development
- Teacher Materials
  - Teacher Edition
  - Assessments for Learning and Building Mastery
  - State Assessment Skill Builder
  - DVD: Demonstrating all Lessons
  - Classroom Manipulative Kit
  - Digital Version of the Teacher Edition and Student Book
  - Transparency Set
- Consumable Student Book

*“Algebraic Thinking students gain more confidence in their mathematical achievements. They learn to “try” to solve the problems.”*

—Ellen Mangles

2008-2009 Middle School Teacher of the Year  
Maryland Council of Teachers of Mathematics
